Professional Summary

DevOps Engineer with 2+ years of experience in cloud infrastructure, CI/CD automation, Infrastructure as Code, and containerized environments. Hands-on experience managing AWS cloud infrastructure and implementing automated deployment and provisioning workflows. Experienced in Kubernetes and operational automation, with a focus on improving deployment efficiency and reducing manual intervention. Proven ability to support secure, scalable, and reliable cloud environments through automation, security, disaster recovery, and cloud optimization practices.

Technical Skills

- **Cloud Platforms:** Amazon Web Services (AWS), Azure, Aviatrix
- **Infrastructure as Code:** Terraform
- **Containerization & Orchestration:** Docker, Kubernetes, Helm, ArgoCD
- **Configuration Management:** Ansible, Chef
- **Scripting & Programming:** Python, Bash, Shell Scripting, YAML, Groovy
- **Monitoring:** Amazon CloudWatch, Prometheus, Grafana
- **Databases & Data Technologies:** MySQL, Redis, ClickHouse
- **CI/CD & Version Control:** Jenkins, Git, GitHub

Experience

Aurochs Software **Sept 2024 – Present**
DevOps Associate Pune, Maharashtra

- Designed and managed CI/CD pipelines using Jenkins, reducing deployment errors by 30% and deployment time by 40%.
- Developed Python-based automation scripts, reducing manual operational tasks by 25% and improving operational efficiency.
- Managed end-to-end database migration activities, ensuring data integrity, minimal downtime, and successful post-migration validation.
- Executed Business Continuity Planning and Disaster Recovery (BCP/DR) activities for multiple clients, ensuring system availability, failover readiness, and backup validation.
- Implemented FRPC for secure remote access to virtual machines without exposing public endpoints.
- Coordinated end-to-end Vulnerability Assessment and Penetration Testing (VAPT) activities, tracking and resolving security vulnerabilities to maintain application security and compliance.
- Optimized AWS infrastructure costs through systematic resource cleanup using CleanCloud and strategic utilization of Reserved and Spot Instances.

Projects

Automated New Client Onboarding | Jenkins, Terraform, AWS, Docker, ECR, EC2, ALB, RDS

- Built a self-service onboarding platform using a parameterized Jenkins workflow to capture customer requirements and automate initial infrastructure and application setup.
- Automated customer-specific AWS infrastructure provisioning using modular Terraform, enabling consistent and repeatable environment configurations.
- Implemented Terraform remote state and locking for controlled infrastructure provisioning, and automated Docker image builds, Amazon ECR publishing, and EC2 deployment during customer onboarding.

AWS IAM Key Rotation Automation | AWS Lambda, CloudWatch Events, Python (Boto3)

- Automated IAM key rotation, reducing manual effort and improving security compliance by 80%, with seamless integration across Jenkins, Airflow, and Unix servers, achieving 100% compliance with security policies.

Education

Nutan Maharashtra Institute of Engineering and Technology **Aug 2020 – Jun 2024**
Bachelor of Computer Engineering – CGPA: 8.85/10 Pune, Maharashtra

Certifications

- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified: DevOps Engineer Expert (AZ-400)
- Introduction to Kubernetes (LFS158) – The Linux Foundation
- Google Cloud Gen AI Academy
